

Store Execution Management

Streamline execution and compliance with comprehensive mobile communication and task management.

Executing key strategic initiatives while ensuring daily tasks are correctly performed is a common retail struggle, especially without a consistent structure, methodology and process. Logile delivers easy-to-use mobile solutions that ensure your associates know what is expected while enabling your managers to effectively manage and monitor task compliance.

Logile Store Execution Management is based on our powerful Task Engine that simplifies the creation, planning, distribution and communication of training, projects, tasks, reviews, audits and surveys. Information flows only to employees who need it, when they need it, and how they need it. Start realizing greater productivity, more consistent and timely execution, and improved employee morale.

Task Execution

Our Task Engine supports a variety of solution-based apps to enhance many key aspects of execution

management, including food safety and store conditions/compliance, with more apps already in development.

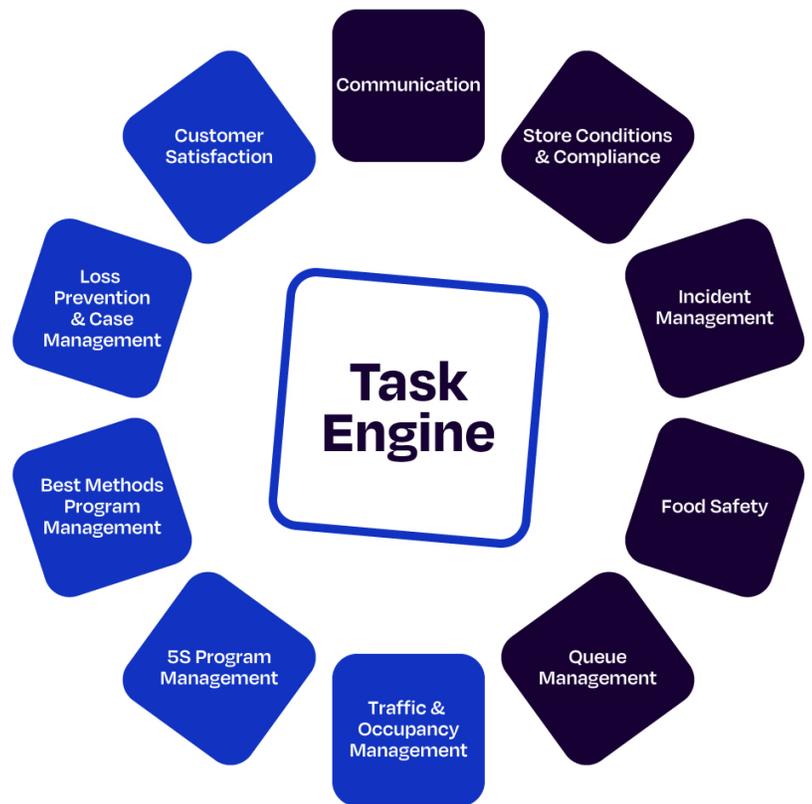

We not only want to schedule the right people at the place at the right time, but we want to ensure that they are doing the right things in the right way—following company best-practice guidance.

Our Task Engine and various apps are designed to help you deploy faster and to tailor our solutions to meet your brand-specific needs. Separate task and WFM solutions never achieve this level of integration. We offer a seamless solution on an integrated platform that makes deployment, training and store use much easier for stores to achieve best results.

Key to our objective is the creation of a unified work list —by department or by associate—that combines the Heartbeat tasks defined in the labor model with corporate directives, specialized tasks from our solution-based apps, and store-created task items. This makes for a highly customizable solution you can tailor to your business requirements to guide associates to do what is needed in the right way. Our execution management design is a total game changer.

Logile Task execution is integrated through the Task Engine in one platform

- This design is critical to the integration for stores to manage one unified task list
- Each app features customized task templates to fully address the specialized needs of each area

- App available
- App in development

Communications

Streamline employee communication and ensure message delivery of your everyday operational communications as well as push to device emergency notifications in times of crisis.

Store Conditions & Compliance

Leverage our extensive library of customizable operations templates, compliance and reporting for tasks associated with running a clean, well-managed store and executing corporate merchandising and advertising programs.

Food Safety

Protect your customers and brand with unparalleled solution-driven guidance, wireless temperature

sensors and help with Hazard Analysis and Critical Control Points (HACCP) program automation, training, measurement, reporting and compliance.

Other Store Solutions

Our solution-based apps address real operational challenges. Use Incident Management to initiate tasks at the store level that require corporate resources to complete, and route to the appropriate corporate contact to expedite. Use Queue Management to equitably and efficiently manage—and track—customer queuing at service counters that don't have obvious queuing lines. Other apps target 5S program compliance, best methods compliance and coaching, loss prevention case management, etc.

Logile is the leading retail labor planning, workforce management, inventory management and store execution provider. Our proven AI, machine-learning technology and industrial engineering help retailers worldwide achieve operational excellence and provide the best service and products at optimal cost. Gain the Advantage with The Logic of Labor. Beyond workforce management—complete store planning and execution solutions. [Logile.com](https://www.logile.com)
